

## Photographing Polar Bears and Arctic Wildlife in Churchill, Canada with Gregory Sweeney

29 October – 3 November 2021

\$ 4,800 (USD)

**\*\* Please note at this time, This itinerary is based on current available information. Flights and other schedules are not set due to Covid-19 – itinerary can change in response to flights and other new schedules \*\***

Every October and November, polar bears congregate in the Churchill area to await the return of the sea ice and access to their preferred prey: the ringed seal. This is one of the largest congregations of polar bears and is very easily to access from Churchill and the surrounding wildlife areas. It is the perfect opportunity for photographers and wildlife lovers to experience bears as well as close encounters with arctic foxes, caribou, and snowy owls in their habitat.

We will be based at the Churchill Northern Study Centre along the Hudson Bay coastline and venture out to photograph polar bears and other wildlife each day and perhaps see Northern Lights and spectacular night skies from their viewing decks and observatory dome. The Centre also has a library, recreational spaces, and active research facilities.

We tour the Churchill Wildlife Management Area for 1 day on a tundra vehicle with an outside observation deck experiencing the tundra, boreal forest, and marine biomes and their wildlife. Not all bear tour companies in Churchill have the required permits to explore the full Wildlife Management Area, but we will travel with those that do possess one of the few permits for the year. The specialized vehicles go where no other vehicle can navigate and you get a real sense of the arctic landscape that is home to the polar bear during this season.

We will also have a private van for traveling around Churchill's wild areas for 2 of our days. These days we can make our own pace and also concentrate on other species if we wish while looking for more bears. On our arrival day in Churchill we will have a half day tour planned. On this day we can view wildlife, the local museum, and artist shops.

The Northern Studies Centre is surrounded by wilderness and immersed in the beauty of this area. We often see wildlife right outside our windows and can enjoy the night sky and on a lucky occasion, the Northern Lights. This trip is limited to 8 guests and photography host, Gregory Sweeney, will accompany you.

## Itinerary

We will meet in Winnipeg; stay overnight in an airport hotel then fly in the early morning to Churchill. Once in Churchill we transfer to the Northern Studies Centre located 23km outside of Churchill inside the Wildlife Management Area. The Centre will be our base for the 3 nights while we enjoy the arctic wildlife. After lunch at the facility and meeting its researchers, We will venture out until late afternoon in our van to see wildlife and highlights in town. After dinner we have time for stargazing and night photography. With luck the northern lights will be active. We will have 3 full days of full day photography outings. After our 3<sup>rd</sup> night at the Centre we have a full day out photographing, then catch a late flight back to Winnipeg. We stay in a hotel for the night and guests will depart on their own schedule the next morning.

Oct 29: Meet in Winnipeg. Stay in Hotel

Oct 30: Flight from Winnipeg to Churchill. Transfer to Studies Centre, possible ½ day van tour, orientation presentation to Northern Studies Centre

Oct 31 Private Van tour for Wildlife and bears

## **Travel Planning**

Guests should arrange to fly into the Winnipeg Airport (YWG) on 29st October (or before) and fly out on the 3rd November (Flying out on the 2nd after 11pm is possible, but risky due to frequent delays leaving Churchill)

## **Accommodation at the Churchill Northern Studies Centre**

The Churchill Northern Studies Centre

Reception / Lobby

Outside Observation Deck

The Churchill Northern Studies Centre was founded in 1976 and is an independent, non-profit research and education facility. They provide housing, logistical, workspace, and equipment for scientific researchers working on a range of topics of interest to northern science. The building is situated along the Hudson Bay seacoast and is seeking LEED certification for its low environmental impact construction and operation.

All accommodation at the Centre is shared in 21 guests rooms- up to 84 guests . The rooms have a maximum of four people assigned per room in two bunk beds. During this busy season no private rooms will be available. The rooms also have bedside lights, multiple electric plugs, 4 closets and ample desk space.

Guest Room

The Centre has private shower rooms, laundry available (extra cost), communal male/female segregated washrooms with water saving features.

It is a spacious facility and has many places to relax including a heated observation dome, lounges, cafeteria, audio/video lounge, fitness room, and outdoor observation deck.

Meals are prepared and served in the Centre's cafeteria. Vegetarian, low-salt, gluten-free, and other dietary needs are supported to the best of their ability. The CNSC is a fragrance free workplace: Thank you for not wearing any cologne, after shave, perfume or perfumed products.

Cafeteria
